

Data analysis findings.

Executive Summary

Based on gathered data, the conclusions obtained are:

- IFCO business started with 5000 assets, from them we estimate 764 were lost.
- Shrinking rate is 1%
- We estimate 489 assets available in our SC

Time between rentals and asset loss

According to the statistical models developed we consider an asset lost if it is not rented again in 230 days.

Time between rentals and asset loss

We lost assets in 689 trips from 65882 trips analyzed.
Which makes a shrinking rate of 1%.

Pool size

Considering the RPC lost, and the probability of having an asset not traveling (11.5%) we can estimate today a pool size of 489 RPC available in the SC.

Estimate of the current status of initial assets
